

Prescriber Notification: Nitrofurantoin Oral Suspension and Azithromycin Drug Shortages

May 1, 2020

The Texas Vendor Drug Program has identified drug shortages of Nitrofurantoin oral suspension and Azithromycin products on the Medicaid and CHIP formularies. There are many other antibiotic choices available on the formulary and prescribers may choose an appropriate alternative based on patient diagnosis and indication for use. Prescribers are encouraged to use the [VDPFormularySearch](#) to identify other antibiotic options to avoid delays in people receiving medication.
